PART 2: The Project/s.....	8
5. Project Summary and CAPS alignment.	8
6. The Project in more detail.....	9
7. Assessment rubric for project and presentation of project solution	13
8. Memo and Tips	14
PART 3: TEACHER RESOURCES	21
9. Tools to assist with the Project	21
9.1 Letter to the parents/caregivers	21

9.2	Primary vs Secondary sources.....	22
9.3	The Big Question in research	23
10.	Professional Development	25
10.1	Traditional vs Activity-based Learning	25
10.2	The Project-based Learning Cycle	26
10.3	The Project-Based Learning facilitator.....	27
10.4	The E ³ Competencies model within the CAPS.....	28
10.5	The journey to PBL via Enquiry-based and Problem-based Learning	28
10.6	Bridging the Unemployment gap through Education	29
	Teacher Agency Award Entry Form.....	30

PLEASE NOTE

Part 1 and 2 **of this booklet must be printed** and are the minimum project resources you as the teacher will need. However, the rest of the booklet contains valuable tools for personal development, as well as very good sources in support of the project. You don't have to look anywhere else.

Don't forget to **enter the Teacher's Agency Awards** (see page 2)

This programme is accompanied by **podcasts, audio recordings and videos**.
We will send out the links shortly.

Before you start, please **complete the Teacher's Mindset Rubric** on page 3.

Dear Teacher

Provided herewith is a **Learner's Project Workbook** and a set of **Teacher's Project Notes for the School- Based Assessment (SBA) Task for Term 3** as per SBA Plan in Section 4 of the CAPS. These documents are specially created to support you with COVID-19 issues for your subject as per the trimmed Annual Teaching Plan (Section 3) for Term 3.

Most importantly it is envisaged that this will lessen your work-load as we come to grips with the disruptions caused by COVID-19.

The Learner's Project Workbook and Teacher's Project Notes were created by DBE-E³, a unit at the National Department of Basic Education which is rolling out Project-Based Learning (**PBL**) in schools to better prepare learners for a changing world. Although you may not be part of the DBE-E³ Programme as yet, these projects are created to:

1. Engage learners in processing the pandemic which is affecting their lives and those of their families;
2. Promote learner self-reliance and independent learning using safety measures; and
3. Encourage social learning in a safe environment.

Where did this all start?

E³: Entrepreneurship, Employability and Education is currently being rolled out in SA schools.

The DBE-E³ Unit, in response to the National Development Plan, has been working in public schools since 2018 to advocate the eventual implementation of Activity-Based Learning, with special focus on **PBL**. E³ is part of a DBE programme to introduce *Thinking Skills for a Changing World* into the curriculum in its effort to reduce youth unemployment substantially by 2030.

How did this work in 2018 and 2019?

Initially three provinces in 2018, and then all nine provinces in 2019, implemented PBL in Term 3, the term in which the SBA is an actual project. This meant that the projects, written by teachers for teachers were available to select schools by the provinces as part of a pilot research project. In this initial phase schools on the programme were provided with projects for Life Skills Grade 4-6, EMS Grade 7-9 and Life Orientation Grade 10 to 11.

The Learner's Project Workbook and Teacher's Project Note is as a critical resource for you during COVID-19, and the beginning of activity-based learning and PBL as a teaching method DBE- E³ is consciously promoting.

We truly respect your anxiety during this time, acknowledge your commitment and appreciate all your hard work.

Teacher Agency Award

RECOGNISING SOLUTION-SEEKING TEACHERS ENTER THE TEACHER AGENCY AWARD

If it's going to be, it's up to me

CALLING ALL TEACHERS!

Think you lead the way in
creating solutions to problems?

Enter this award and be rewarded
and recognised for your unique
problem-solving abilities.

SO WHY?

To reward you for being awesome! You have shown that you care, that you have found a solution to a problem that helps others and that you have just gone ahead and made it happen.

We want to acknowledge and reward you and tell the world you are our hero! We want to reward you if you can show us that you are self-motivated, self-directed and want to grow - and if you are driven by purpose and the desire to help others.

WHO ME?

Yes you! Any teacher or school official who is doing something for the greater good.

WHAT WILL I WIN?

T&Cs: We will be awarding exciting, significant prizes of up to R5000 per prize winner. These will go to worthy recipients from each province whose solutions meet the criteria on the entry form. These will be judged by E³. Awards will be announced in the first week of every month starting in August 2020. If no worthy entry is received that merits a prize, E³ reserves the right not to award a prize for that month.

The last winners will announced in the first week of October 2020 when this opportunity closes. Keep an eye of the E³ website to see if you have won and to celebrate the other winners and admire their solutions.

WHEN MUST I HAND IT IN?

NOW! You can apply anytime whenever. This is an ongoing opportunity that has no deadline. How cool is that?

WAIT WHAT?!

So here's what you need to show us - you need to be able to tell us that you:

- 1 Had the courage to just get going
- 2 Had belief in yourself to just do it
- 3 Activated a range of competencies that makes you THE person that this new crazy world needs to fix it and solve its problems such as:
 - 3.1 A great character who is self-motivated to be a SA citizen who cares, who is curious about fixing things and who has the energy, enthusiasm and resilience to carry on.
 - 3.2 The ability to think and be creative, figure things out, find the information you need and make sense of it.
 - 3.3 How you made connections, how you collaborated and communicated with others as you stood in their moccasins to solve problems.

SO HOW MUST I APPLY?

It's really simple - just fill in the form at the back of this book and submit it to us.

Or submit the form on the E³ website:

www.e3-dbe.org
www.ecubed-dbe.org

RUBRIC TO RATE THE LEVEL OF COMPETENCIES AND E-MINDSET					
Did your entrepreneurial mindset grow whilst managing this project?				Personal rating (1=Poor, 4=Excellent)	
				Pre-project	Post-project
COMPETENCIES	Character	Citizenship	I am very committed and involved in various activities in my community and people regard me as someone to follow in my circle of influence.		
		Curiosity	I am very curious about everything around me and all my senses are alerted to possibilities which I always put into practice.		
		Resilience	When I face challenges I am always excited about the possibilities and I always get up after I have been unsuccessful. I am always enthusiastic about what I have learned in the process.		
	Thinking	Creativity	I always use my imagination to come up with original ideas and/or I am always creating new things.		
		Critical thinking	I always form judgements based on my ability to analyse and evaluate objectively.		
		Reasoning	I always think about things in a logical and sensible way and I always come up with conclusions easily.		
	Collaboration	Collaboration	I always produce good work / things by working well with people (individuals or a team).		
		Communication	I am always successful in conveying or sharing ideas or feelings.		
		Empathy	I have a highly developed ability to understand and share the feelings of others.		
E-MINDSET	Agency	Growth mind-set	I am always open to new information and am always willing to change my beliefs, assumptions and actions as a result.		
		Motivation	I always do what needs to be done without needing to be influenced by other people or situations. I always find a reason or the strength to complete a task, even when it is challenging, without giving up or needing anyone else to encourage me.		
		Internal locus of control	I always have control of my life and my work is always my own and it is because of this that I experience success often. I never blame others or circumstances on my lack of success.		
		Regulation of emotion	I always respond to the demands of a situation with emotions that are socially tolerable and sufficiently flexible to allow spontaneous or delayed reactions – whichever are appropriate.		
	Self-efficacy	Tasting success	I have always done things successfully enough to give me “the taste of success” that makes me motivated to want more and to believe that I can get it.		
		Socially relatable role model	I have always been fortunate to have been exposed to excellent role models that I can relate to and who make me motivated to want to be like them.		
		Positive support	I have always been fortunate to have had someone who has been a positive support to me and who has encouraged me and seen me as a person.		
	Solution-seeking	Resourceful	I always find quick and clever ways to overcome difficulties and find solutions.		
		Problem solving	I always find solutions to difficult or complex problems.		

PART 1: Setting the scene

1. The trimmed projects - E³ response to COVID-19

In collaboration with the DBE we have created projects for the new trimmed curriculum. In the past, lead teachers would gather and projects would be created during a writers' workshop. A similar process is being followed now, but the trimming of the curriculum has made it difficult to create one solid, clear project anchored by a community/learner problem because Term 3, the project term, now has to cover a number of themes very superficially.

We have tried to create a coherent project which follows internationally-accepted standards in that it is research-based and includes enquiry-based learning and problem-based learning as part of the Project-based Learning process whilst adhering to the CAPS requirements of the trimmed ATP.

Time frame for project completion - assessment

The assessment for Term 3 is a project. Do not use the number of hours allocated to determine which project/s you feel will be useful for your learners (e.g. Week 1). As long as there is one project mark by the end of the term for the SBA (50 marks), the CAPS requirement will have been achieved.

However, we do encourage you to use this opportunity to press learners to do as much research and investigating as is possible – if we plan this well we shall succeed.

Encourage learners to keep visual evidence of the process of their projects: E³ has invited learners to submit evidence of their project to the URL/contact details in the Learner Workbook – we would love to showcase your school!

Ideas for planning:

1. Write a letter to the caregivers, parents, family and siblings (a letter is part of the Resource Pack at the end of these notes) explaining the need for their support.
2. Break up the project (each could be 3-4 weeks long) into small deadlines that you will check.
3. Help learners manage some social learning. (See social learning below)

Pre-plan

2. Social Learning during COVID-19 (Coronavirus)

Individual learners will be “scientists” and go through a process (including elements of design thinking, problem-based learning, etc.) which will guide them to solve a problem. Learners will not have groups to work with, but the social learning can be facilitated by:

The teacher’s role

Notes/WhatsApps/face-to-face questions to teachers (give them a contact number or place a box for queries at the door of your classroom);

Be available

Wh-wall

A WH-wall for Who? Why? What? (and also How?) questions that are posted on the wall.

Learners write their open-ended question in large letters on pages that can be stuck on the wall, anonymously if learners wish. You could review all the questions once a week (after they have been on the wall for at least 48 hours) and answer the important questions.

The questions need not be about the project – it is a great opportunity to allay general fears about the “new normal” of living and going to school during the pandemic and also to encourage questioning techniques and so strengthen the fundamentals (especially language).

Buddy-guard

A buddy-guard (a safe critical friend whom s/he has identified before the project has started) is the learner’s primary sounding board. The pair will agree that they give each other support and feedback at school with social distancing and via text and WhatsApp messages).

Critical, safe partner.

A buddy-guard is a special friend who cares about you and wants to support and look out for you.

The role of the family

The family (care-givers will also have a letter sent to them to explain their role).

▷ 3. Generic Project outline for all Projects (directed at the learner)

1. PLANNING

1. Learners brainstorm the problem that needs to be solved on their own, or with their buddy-guard, teacher or family. The brainstorm could also be a class activity done by the entire class.
2. Learners list questions that will help them think of the BIG question that will guide them in solving the problem.
3. They write down the topic of their research – the BIG question.

Step 1:
Project topic
guided by a
big question

2. RESEARCH/ FINDING OUT

1. They note down five sources of information from the following that they are planning to use to gather information:
 - People they could interview
 - Articles they could read
 - Websites they could go visit
2. They identify someone who might help them if they need information whilst stuck at home.

Step 2:
Plan research
sources

3. MAKING AND SHOWING THE EVIDENCE

1. What equipment will be needed to create the project item?
2. Where will information on how to make the item be found?
3. How many times did they try before they got it right?

Step 3:
Making creative
project item and
documenting
the process

4. GETTING FEEDBACK AND CHANGING IF THEY NEED TO

1. Learners get feedback from their buddy-guard, parents or caregivers or teacher.
2. They use information they have gathered to improve their product.
3. They note what they changed, when they made changes and why.

Step 4:
Feedback

5. FINISHING OFF THEIR PROJECT

Using all the feedback and what was learned after trying to improve their product, learners finish off their project item and the writing that goes with it.

6. SHOWING OFF THEIR PROJECT

1. They show their project to as many people as can be done safely.
2. People who view the projects (even those at home) write down their feedback or leave notes or send voice notes. Learners ensure that their WhatsApp number is on the project item and notes.
3. The final item is taken to school and the teacher and learners arrange show the projects to the rest of the school.

7. THINKING ABOUT IT AFTERWARDS

1. What did they love about working on this project?
2. What made this project hard for them?
3. What did they learn by working on this project?
4. What would they do differently if they did a project like this again?

Step 5: Finishing off

Step 6: Showing off projects

Step 7: Reflection

4. Resource Pack

See the Resource Pack at the end of these notes to help you manage the project and to help you save time. Included you will find:

Resources in the Teacher's Project Notes

1. Practical Assistance, e.g.:
A letter to the parents and caregivers.
2. Professional Development, e.g.:
The Project-based Learning (PBL) Cycle and your role as a Project Manager; The journey to Project-based Learning which starts with Enquiry-based Learning and Problem-based Learning, etc.

Resources in the Learner's Workbook

The Learner's Project Workbook is enriched with many resources to help the learner complete the project independently. There are rich resources to help you explain concepts more easily too!

- ✓ After discussing the CAPS topic with your class, learners are orientated towards the project and then left to deal with the project independently with access to all their resources.
- ✓ The number of weeks allocated to a topic in the CAPS does not mean that the length of the project is limited. Remember: the project is a tool to allow deeper investigation into a serious problem that impacts learners.
- ✓ We recommend that a learner be given 3 to 4 weeks to complete a project.

PART 2: The Project/s

5. Project Summary and CAPS alignment.

Alignment CAPS trimmed ATP	Description of Project
Week: 1-4 Definition of an entrepreneur; Characteristics of an entrepreneur; Skills of an entrepreneur; Entrepreneurial actions of buying, selling producing and making a profit; Needs and wants of consumers; SWOT analysis; COVID-19 problem solving Effect of health epidemics on formal and informal businesses	Learners look at a problem created by the COVID-19 pandemic and create a product or service as a solution to this problem.

6. The Project in more detail

The following step-by-step unpacking of the project explains the teacher's role in the step-by-step roll-out of the project, the PBL cycle and Enquiry-based and Problem-based Learning. **Items marked with (*) can be found in the Resource Library in the Learner's Workbook.**

Solving a COVID-19 problem

 STEP 1: Planning			
Task	Teacher's role	Resources	Competencies <i>Underline what you think has been achieved.</i>
<p>Play the Entrepreneurial Profile game:</p> <p>Learners draw a picture of a human skeleton on paper and label the body parts with entrepreneurial qualities, e.g. eyes – for seeing or recognising opportunities</p> <p>Come up with a definition of an entrepreneur</p> <p>Identify the skills, characteristics of an entrepreneur</p>	<ol style="list-style-type: none"> Hand out A3 paper and koki's to buddy pairs in class. Ask learners to draw a human skeleton. Guide learners to label all the parts with entrepreneurial qualities. Give time for each pair to present their ideas. Summarise these ideas on the board and sort according to entrepreneurial <ol style="list-style-type: none"> knowledge, skills and competencies attitudes and mindsets. Discuss the differences. Lead discussion in the formulation of a definition for an entrepreneur. Let each learner write his/her idea down in Learner book. Then put a final definition together using the textbook as an anchor. Discuss the idea of a BIG question in research. Homework (HW): Learners independently do Step 1 in Learner books. They choose a big question to research and solve. 	<p>Flipchart or A3 paper</p> <p>(Learners work in pairs with their buddy-guard.)</p> <p>Coloured kokis</p> <p>Black-/Whiteboard to collate ideas</p> <p>Skeleton picture in Tips and Memos section</p> <p>*Big question in research</p> <p>Textbook</p> <p>Learner Workbook</p>	<p>Character</p> <p>Citizenship</p> <p><u>Curiosity</u></p> <p>Resilience</p> <p>Mindset</p> <p>Connection</p> <p>Collaboration</p> <p><u>Communication</u></p> <p>Empathy</p> <p>Thinking</p> <p>Creativity</p> <p><u>Critical thinking</u></p> <p><u>Reasoning</u></p>

STEP 2: Research/ Finding Out

Task	Teacher's role	Resources	Competencies <i>Underline what you think has been achieved.</i>
Identify a business idea that creates an opportunity or solves a problem during the COVID-19 pandemic	<ol style="list-style-type: none"> 1. Discuss the needs and wants of consumers with learners. 2. Explain the product cycle a template and ask learners to identify a product/service that can be successful during COVID-19. 3. Explain the difference between primary and secondary sources, and how they should go ahead with independent research. 4. HW: Do step 2 in Learner's Workbook. 5. HW: Bring business idea to next class. 	Pens *See Primary and Secondary sources in Resource Library (Learner's Workbook) *Product development cycle Textbook Learner's Workbook	Character <u>Citizenship</u> Curiosity Resilience Mindset Connection Collaboration Communication Empathy Thinking <u>Creativity</u> <u>Critical thinking</u> <u>Reasoning</u>

STEP 3: Making and showing the evidence

Task	Teacher's role	Resources	Competencies <i>Underline what you think has been achieved.</i>
Setting goals for the business; Doing a SWOT analysis on the business; Drawing up or creating a prototype of the product or service.	<ol style="list-style-type: none"> 1. Discuss goal setting for business with learners. 2. Demonstrate SWOT analysis on a volunteer business. 3. Learners now independently work on putting their product/service together. 4. They might need guidance through process. 5. HW: Step 3 covering SWOT, budget and goal setting. Independent work on product creation process. 	*Product creation process Learner's Workbook NOTE: Extended learning opportunity. Videos: Nabira and Sally. (Show examples of an informal and a formal small business). Formal vs. Informal business plus SWOT analysis	Character Citizenship Curiosity Resilience Mindset Connection <u>Collaboration</u> Communication Empathy Thinking <u>Creativity</u> Critical thinking <u>Reasoning</u>

STEP 4: Getting feedback and changing if you need

Task	Teacher's role	Resources	Competencies <i>Underline what you think has been achieved.</i>
<p>Setting a budget for the business</p> <p>Getting feedback from discussion groups (family) or buddy-guard, even possible clients (keep social distance)</p> <ul style="list-style-type: none"> • Will they pay for the product/ service? • What are they prepared to pay for the product/ service? • Is the produce/ service a viable idea? • CHANGE what needs to be changed or adapted 	<ol style="list-style-type: none"> 1. Look at budgets for business startup and prototype creation. Let learners compare with budget they set for homework. 2. Guide learners in setting up a budget for their business 3. Explain buying, selling, producing and making a profit. 4. Ask feedback on alternative sources to money (e.g. sponsors, reusable items, repurposing, recycling etc.) 5. Explain why feedback is important for the viability of the business prototype or service idea. 6. HW: Learners do step 4 in Learner Workbook and get as much feedback as possible on their ideas. They consider making changes. 	<p>*Example of a business budget and income and expenditure statement.</p> <p>*How to make a profit.</p> <p>Learner's Workbook</p>	<p>Character Citizenship Curiosity Resilience Mindset Connection Collaboration Communication Empathy Thinking <u>Creativity</u> <u>Critical thinking</u> <u>Reasoning</u></p>

STEP 5: Finishing off your project

Task	Teacher's role	Resources	Competencies <i>Underline what you think has been achieved.</i>
<p>Learners work at home or in class, polishing their product idea or service according to feedback from family and possible clients.</p>	<ol style="list-style-type: none"> 1. Guide learners through the process of change and adaptation, and the reason for it. 2. Share principles of a good presentation for the presentation of their product or service in class. 3. HW: Learners finish their products and services. Prepare a presentation for the class. Complete Step 5 in Learner Workbook. 	<p>*Guide on good Presentation</p> <p>Learner's Workbook</p>	<p>Character Citizenship Curiosity <u>Resilience</u> <u>Mindset</u> Connection Collaboration Communication Empathy Thinking Creativity Critical thinking Reasoning</p>

STEP 6: Showing off your project

Task	Teacher's role	Resources	Competencies <i>Underline what you think has been achieved.</i>
Learners present their product or service to the class and the teacher	<ol style="list-style-type: none"> 1. Give learners each a few minutes to present their products or services to the class. 2. Allow feedback by other learners. 3. HW: Learners do Step 6 in Learner's books 	Rubric for presentation and product/service design idea Learner's Workbook	Character Citizenship Curiosity Resilience <u>Mindset</u> Connection Collaboration <u>Communication</u> Empathy Thinking Creativity Critical thinking Reasoning

STEP 7: Thinking about it afterwards

Task	Teacher's role	Resources	Competencies <i>Underline what you think has been achieved.</i>
Reflection on success or failure of the project and lessons learned	<ol style="list-style-type: none"> 1. Please don't skip this step. 2. Give learners time in class to reflect on the success of their project. 3. Do the teacher's reflection rubric 	*Teacher's Reflection rubric; Learner's Workbook	Character Citizenship Curiosity Resilience <u>Mindset</u> Connection Collaboration <u>Communication</u> <u>Empathy</u> Thinking Creativity Critical thinking Reasoning

7. Assessment rubric for project and presentation of project solution

	Not achieved (1-2)	Partially Achieved (3-5)	Achieved (6-7)	Fully Achieved (8-10)	Learner Mark
1. Product or service solves a critical COVID-19 problem/or is a viable buss idea during COVID-19 times	Product or service choice does not meet the criteria.	Product or service choice partially meets the criteria.	Product or service choice meets the criteria.	Product or service exceeds the criteria. Creative problem solving.	
2. SWOT analysis: Look at both the internal and external factors that may influence the business's ability to compete in the market	Response excludes essential components and/or does not address the requirements indicated in the instruction.	Responses includes only one or two of the requirements in the instruction.	Response includes most of the components and meets the requirements in the instruction.	Response includes all components and meets or exceeds all requirements indicated in the instruction.	
3. Creative budgeting – product or service is affordable to manufacture and uses other resources than money	No creative budgeting, no use or alternative sources or resources.	Some creative budgeting.	Creative budgeting, uses many alternative resources like recycling, repurposing, etc.	Incredible creativity in the use of alternative resources to make or create the business.	
4. Project demonstrates both originality & creativity	Project does not demonstrate originality & creativity.	Project demonstrated a little bit of originality & creativity.	Good work, but based on existing ideas.	Very creative and unique project.	
5. Presentation of product to teacher and class	Presentation unsatisfactory, unprepared.	Presentation not ideal, somewhat unprepared.	Presentation good, well prepared.	Great presentation, excellent preparation.	
					/50

8. Memo and Tips

Ice-breaker

Objective:

To introduce entrepreneurship and the profile of an entrepreneur in a playful and defocused manner. This encourages learners to start reflecting on their own entrepreneurial characteristics, whilst playing a fun-filled game.

- 1) Learners play the *Entrepreneurial Profile Game* with their buddy-guards. The game gets quite exciting so ensure that they you maintain social distance. Playing the game outside might help. They study the skeleton and then link a body part to an entrepreneurial competency, skill or mindset, e.g. shoulders – for carrying the burden of the responsibility.
- 2) This activity encourages creative thinking – learners have to use metaphors to unpack the profile of an entrepreneur.
- 3) To create excitement and stimulate creativity even more, create a competition in which the buddy-pair who generate the most links between body parts and entrepreneurial characteristics within a set period of time, are the winners.
- 4) As learners give feedback on their entrepreneurial characteristics, create a mind-map on the board as you sort the class feedback into knowledge, skills and competencies, and mindset.
- 5) They now complete the questions in the ice-breaker before the class goes to your mind-map.
- 6) Using the information on the mind-map and their own self-reflection, together the class create a comprehensive definition of an entrepreneur:

Use your textbook definition to guide you as this is the set of notes learners will be using to study for their tests.

- 7) Learners were asked to think of their own plans for social distancing during the game. What creative solutions did they come up with?
 - If outside, they could merely speak loudly with one person writing down ideas.
 - They could hold up a large sheet of paper with ideas clearly visible.
 - They could WhatsApp each other if cell phones are allowed in class.

Objective:

To introduce Project-based Learning as a process which starts with enquiry and problem-solving and reaction to a local need and then moves through various phases including product design, testing and iterating until a MVP (minimum viable product) is achieved. The steps are not always clear cut, but there is a logical development from step to step.

**PLANNING**

Explain to learners that an entrepreneur needs to do a great deal of thinking and research before deciding on a business idea and a product or service. Planning is critical and a research-based project like this, starts with generating so called “big questions”. Because some learners may struggle with English, we have framed the questions to assist their thinking process. The problem is COVID-19 and the challenge for an entrepreneur is exploiting the opportunity to provide a product or service whilst generating an income and even providing jobs for others.

Initiate the discussion by explaining the above, and kicking off with big questions like:
What are the problems faced by people during COVID-19? (Elderly cannot go shopping, businesses and schools need to sanitise, etc.)

Who can help with services? What services can be provided, etc. Learners generate their own big questions, sort them until they have one and then decide on a business idea and the title of their project:

Example:

One question: How can we help old people that cannot fetch their medicines or go shopping?

Title of the project: Creating a service to assist the elderly with tasks that they cannot undertake as a result of isolation.

If learners are struggling, they can refer to Resource 2 in their Resource Library: *Ideas for COVID-19*. Ensure that they are clear on whether their business is a product, or a service, or both. Also: decide whether the project will be done in pairs or that each learner will complete the project on his/her own, even though the buddies do occasionally engage in “discussion”.

RESEARCH/ FINDING OUT

1. Learners need to **research the viability of their Business Idea**. Encourage them to plan the search for information and to try to include both primary and secondary sources. (Go to the Learner Library Resource 3: **Primary versus Secondary Sources** for more information and examples of each type.)
2. Explain the importance of good references. Each source in the learner's Resource Library is referenced.
3. Make sure that learners have a good understanding of why they need sources (a good researcher produces solid information that is based on evidence) and how to reference these sources. It would be a good idea to help learners identify one person in their circle who could answer questions around research processes – alternatively, that person will be their teacher!
4. Check that they understand that a service is also a business “product”. Learners need to understand that both services and products are viable as business ideas.
5. Check that the final business idea aligns with the title of their research – all the steps need to be trying to achieve the project goal.

MAKING AND SHOWING THE EVIDENCE

1. Learners have now selected a business idea and planned the steps. They now need to set goals, at least 3, for their product or service?
2. Explain how to do a **SWOT (Strengths, Weaknesses, Opportunities, Threats)** analysis on their business ideas to find out if their product or service is viable for starting a small
3. What is the process businesses follow to develop a business idea?

The product development cycle is not part of the trimmed ATP, but share the importance of a step-by-step process in developing a business idea. Learners answer the question on the planning step: using words like target market, competitors, testing the need, etc.

(See Resource 4: The Product Development Cycle in the Resource Library of the Learner's Workbook)

Setting a budget for the business

If you are struggling, go to Resource 5 **Budgeting (BUDGET COVID PTY (LTD). Month 1)** in the Resource Library in the Learner Workbook. Explain budgeting to learners and show them the example of a budget.

Solving the budget problem/Alternatives to hard cash

Most businesses start with loans, donations or other alternatives to get hold of the seed money needed (sponsors, second-hand equipment, home-made items, re-using something, repurposing something else)?

Discuss ideas for generating start-up funds.

Creating your product or service business idea

- Again learners have to plan; “to do” lists are critical
- What equipment will be needed to create their product or service?
- Where will they find it? How will they pay?

They also need a “go to”-person should you not be available to assist. Identify someone with the necessary insight either at school or within the family.

GETTING FEEDBACK AND CHANGING IF THEY NEED TO

1. **Encourage learners to keep visual evidence of the process, at least 5 pictures with the following information:**
 - a. Stage of the making process (beginning, middle, end)?
 - b. What is happening in the picture?
 - c. What was learned that we can see in the picture?
2. **How many times did they try before getting it right?**

Spend some time explaining the importance of iteration (trying and trying again until the product or service is right.) Not only will the business have a quality product or service, but the learner will have grown in resilience and the understanding that the word FAIL merely means ***First Attempt in Learning!***

3. **It is very important that learners ask for feedback from different people.**

The opinions of different people representing different target markets are really important. Explain that as the designer or creator of the business they still have the final say, but a good business person listens carefully and takes she/he can use.

FINISHING OFF THEIR PROJECT

Using all the feedback and what was learned after trying to improve their products, learners finish off the project item and any writing that goes with it. They then reflect on the problem and the solution, also listing challenges.

Finally they rate their product/service/business and explain the score they have given themselves.

The next step is to prepare to present their business idea to the class.

(Go to Resource 6: *How to prepare a great presentation* in the Resource Library in these notes.)

They practise in front of their buddy-guards, ask for honest feedback and, while listening to each other's presentations, tick the above table and share areas for improvement.

SHOWING OFF THEIR PROJECT

Discuss ways of showing off your class's project to the rest of the school or to visitors when they are allowed. Make sure learners have their feedback forms ready.

THINKING ABOUT IT AFTERWARDS

Learners complete their reflection exercise.

Teachers reflection

Now complete the same reflection exercise yourself before going to the second column of the mindset rubric at the beginning on these notes:

1. What did you love about working on this project?

2. What made this project hard for you?

3. What did you learn by working on this project?

- About yourself?

- About entrepreneurship?

- About learning during COVID-19?

4. What would you do differently if you did a project like this again?

PART 3: TEACHER RESOURCES

9. Tools to assist with the Project

9.1 Letter to the parents/caregivers

See below:

Date:.....

Dear Parents, Siblings and Caregivers

The Grade 7 learner in your care will be doing a project or two during the next few weeks.

A large part of the project will be done at school, but an important part will be done after school, at home.

How can you help?

The project plan is quite structured with dates for each step clearly set out. Check the deadlines and help your child understand the importance of keeping to a schedule.

The project asks learners to share information with the family at home and also to ask for feedback and advice. Please set aside some time to help when needed. Perhaps you can ask one member of the family to be the “Advisor” for the family. Your child will have to note the feedback/advice as part of the project, so this is a serious matter for your child.

The Project Pack has all the information resources your child needs, but you may be asked for advice on how to do something. Your experience as an adult will give your child the support needed.

Good luck! Let’s learn from each other and offer our children support, empathy and care.

Good luck!

..... (EMS teacher)

9.2 Primary vs Secondary sources

Sources of information are often categorized as primary or secondary depending upon their originality.

Primary Sources

1. Direct or first-hand evidence about an event, object, person, or work of art
2. Published materials written or produced by someone with first-hand experience of the event.
3. Individual viewpoint of a participant or observer.

Examples of primary sources:

- Interviews, surveys, and fieldwork
- Diaries, personal letters, and correspondence
- Internet communications on email, blogs, and newsgroups
- Photographs, drawings, and posters
- Books, magazine and newspaper articles and ads published at the time
- Public opinion polls
- Speeches
- Original documents (birth certificates, property deeds, trial transcripts)
- Research data, such as census statistics
- Official and unofficial records of organizations and government agencies
- Radio interviews, DVDs, and video recordings
- Government documents (COVID-19 pamphlets, reports, etc.)
- Scientific journal articles reporting experimental research results

Secondary Sources

1. Describe, discuss, interpret, comment upon, analyse, evaluate, summarize, and process primary sources
2. Written or produced after the fact with the benefit of hindsight
3. Lack the freshness and immediacy of the original material
4. Collect, organize, and repackage primary source information to increase usability and speed of delivery, such as an online encyclopaedia.
5. Can be written or non-written (sound, pictures, movies, etc.).

Examples of secondary sources:

- Bibliographies
- Biographical works
- Reference books, including dictionaries, encyclopaedias, and atlases
- Articles from magazines, journals, and newspapers after the event
- Literature reviews and review articles (e.g., movie reviews, book reviews)
- History books and other popular or scholarly books
- Works of criticism and interpretation
- Commentaries and treatises
- Textbooks
- Indexes and abstracts

9.3 The Big Question in research

Essential questions, or driving questions, are a key element of project-based learning, so we've outlined 14 essential question stems to help you craft the most engaging PBL essential questions.

1. How can _____ improve _____?

How can studying different cultures improve our understanding of our community?

How can robotics improve the healthcare industry?

How can access to clean water improve communities, especially during the coronavirus pandemic?

2. How can _____ be applied to _____?

How can entrepreneurship skills be applied to subjects like science and geography?

How can entrepreneurship skills be applied in our daily lives?

How can ethics be applied to solve environmental problems?

3. How can _____ change _____?

How can individuals change their communities?

How can kindness change bullying?

How can the human behaviour change the environment?

4. How would you design a new _____?

How would you design a new school?

How would you design a new system to purify water?

How would you design a new flag for your community?

5. How does _____ affect _____?

How do poor eating habits affect communities around the world?

How does bullying affect our community?

How does violence affect our daily lives?

6. What impact did/does _____ have on _____?

What impact does climate change have on the environment during the 21st century?

What impact does coronavirus have on children's sense of security?

What impact does social media have on our understanding of the facts surrounding the coronavirus pandemic?

7. What makes a good/effective _____?

What makes a good library?

What makes an effective school?

What makes a happy classroom?

8. How do/does _____ impact my community?

How does racism impact my community?

How does the food grown in our region impact what people eat?

How does bullying and violence impact my community?

9. What is the relationship between _____ and _____?

What is the relationship between maths and everyday life?

What is the relationship between science and entrepreneurship?

What is the relationship between transportation and trade?

10. What would _____ be without _____?

What would our school be without classrooms?

What would the Earth's climate be like without the atmosphere?

What would the world be without art?

11. If you were in charge of _____, what would you change?

If you were in charge of our school, what would you change?

If you were in charge of our community, what would you change?

If you were in charge of Facebook, what would you change?

12. How can you use _____ to inspire _____?

How can you use poetry to inspire change?

How can you use storytelling to inspire people take better care of the environment?

How can you use science to inspire people to eat healthier food?

13. What if _____?

What if you could go back in time, what would you change?

What if South Africa did not have schools?

What if the world lost the internet for one year?

14. How might your community change if _____?

How might your community change if it were twice as big?

How might your community change if it rained every day for a year?

How might your community change if every person were given R1 million?

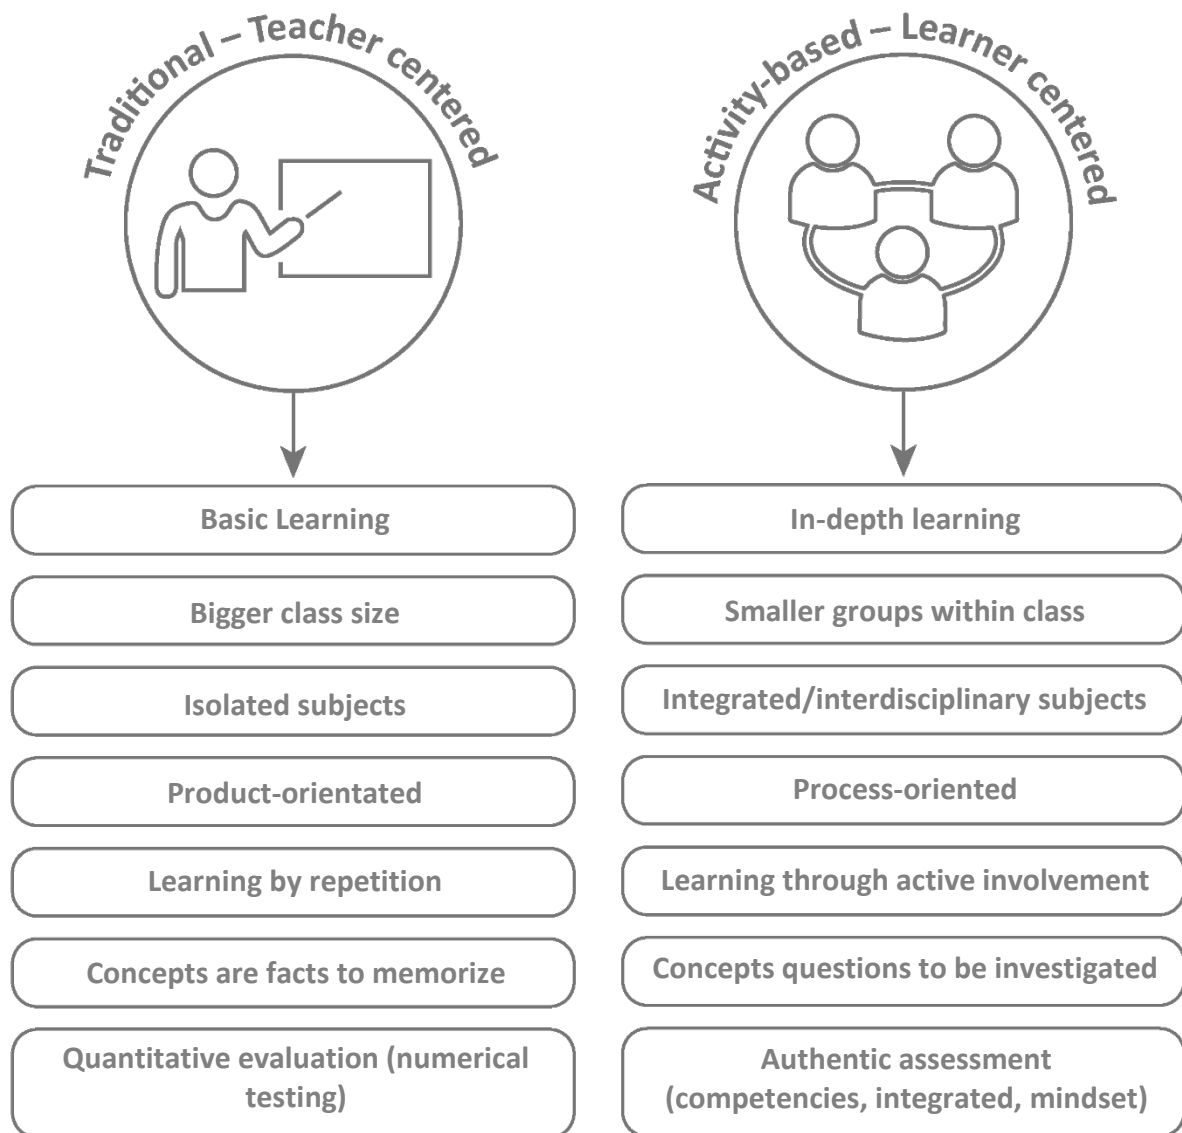

Seeing the different ways learners approach an essential question is one of the most rewarding parts of project-based learning, and you'll get to learn a lot about the learners in your class! Engage students through project-based learning by providing them with great PBL essential questions, then watch them dive in and take control of their own learning.

10. Professional Development

10.1 Traditional vs Activity-based Learning

10.2 The Project-based Learning Cycle

Below please find the **Key Knowledge, Understanding and Success Skills** to help you manage the project.

Challenging problem or question: Why is this project critical? What is the problem in society and at school being addressed in this project? Keep talking about how this project will solve a local or global problem.

Sustained enquiry: Are learners being “researchers”? Are they doing the research and getting deeper and deeper into the problem or are you doing all the talking? Look at the second circle overleaf to remind you of your role: manage activities and scaffold student learning. Learners must not be allowed to give up – you must “build a culture” of getting to the bottom of the problem and coach them when they lose their way. With time E³ will be developing thinking tools to ensure that you are equipped with strategies to take the enquiry to a new level.

(See overleaf for the current PBL learning cycle with a built-in innovation cycle.)

Authenticity: Keep the project real by referring to learners’ own lives – this is about them and their world.

Student Voice and Choice: Although learners did not choose this project, make it fun and real, and applicable to their own world, so that they own it. Their voices and opinions are what your deeper goal is – encourage their views and applaud each contribution.

Reflection: To truly embed learning, learners should be able to reflect on what they have learned and be able to think of better ways of doing things. The reflection activities in the worksheets are not just for fun. Encourage learners to spend time on them as this will deepen their learning.

Critique and Revision: This process is to help learners experiment with their innovation and learn how to improve their work and thinking. As you assess and evaluate their products (not them!) learners will see that there are different ways of solving problems. It is important that learners hone their curiosity and learn how to “stick it out” and keep trying, not giving up when it doesn’t work first time round.

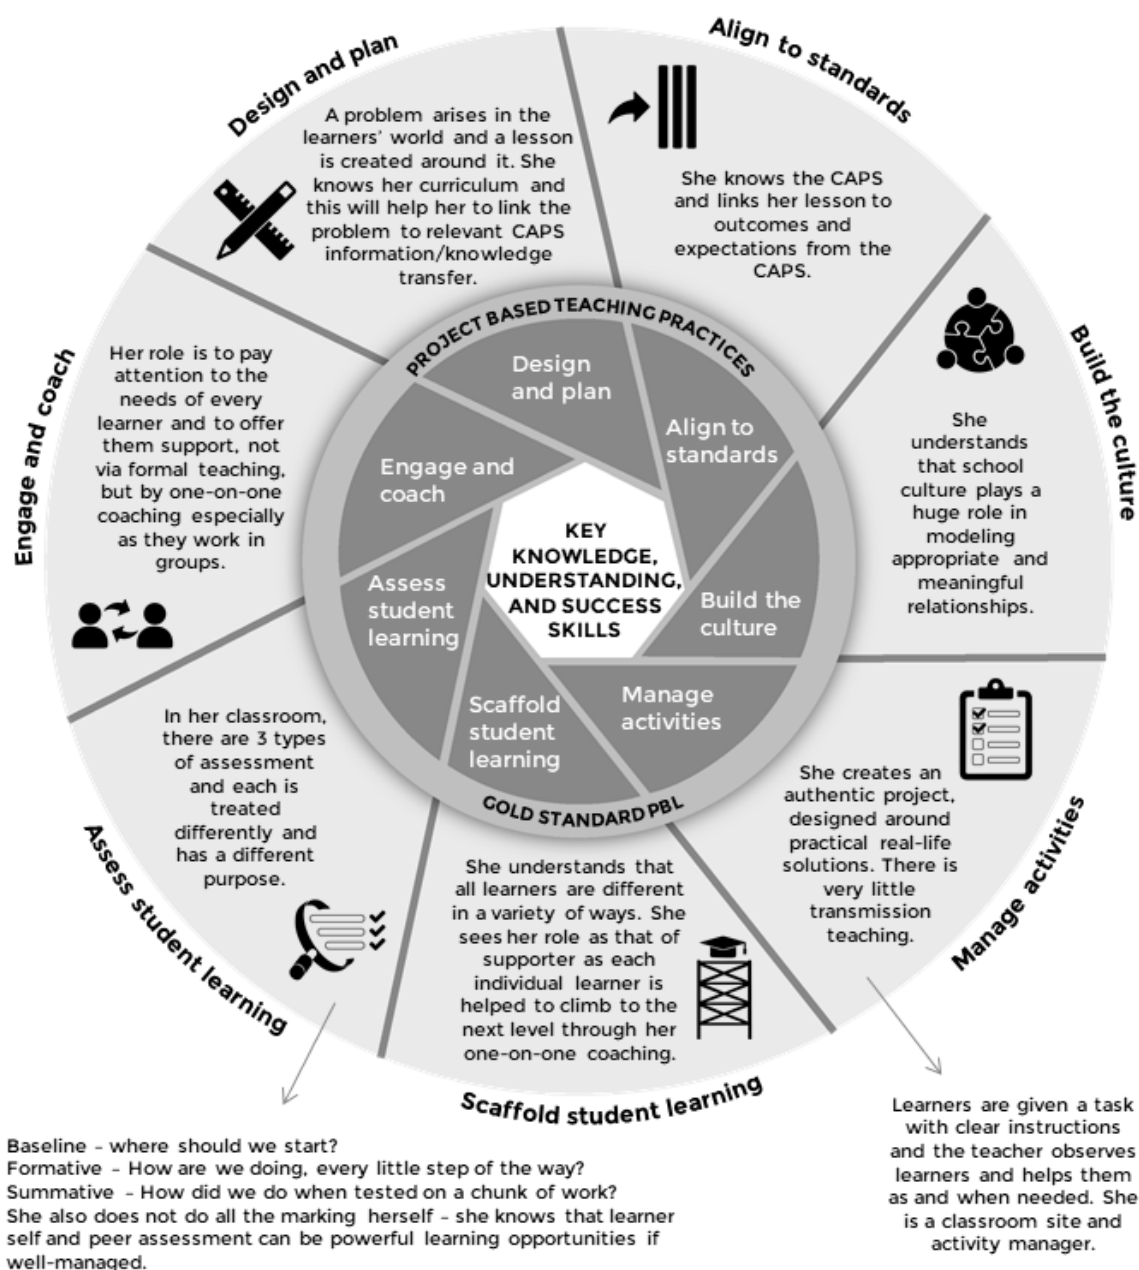

Public Product: At the end of the project what does the learner have to show or to brag about? Ensure that there is a Project Culmination Week in which each grade displays their products during a week selected by the management team to ensure that as many parents and other stakeholders as possible attend.

PROJECT-BASED LEARNING: The teacher's role as the project manager

We as teachers need to reassess our roles. The time for good lecturing has passed. The time has come to put learner needs and their problems at the centre of the lesson and to do everything in our power to make school useful for life after school, to help learners know and believe in themselves and to give them space to become problem solvers themselves... and, of course, to have fun.

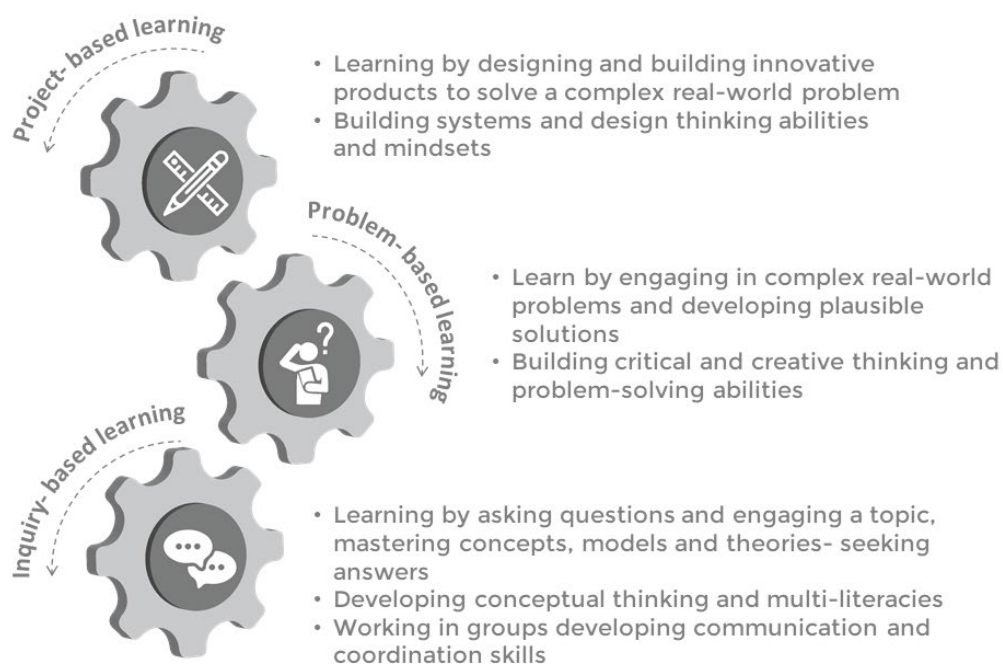

Learners go to school not to WORK, but to LEARN!

10.4 The E³ Competencies model within the CAPS

10.5 The journey to PBL via Enquiry-based and Problem-based Learning

10.6 Bridging the Unemployment gap through Education

TEACHER AGENCY AWARD FORM

Email your completed form to info@ecubed-dbe.org
with the subject line "Teacher Agency Award submission"

info@ecubed-dbe.org

Name:	
Position: (e.g. Teacher, SMT, etc.)	
If teacher:	
Subject taught:	Grade:
School name:	District:
Province:	
Your contact details:	
Email:	Cell number:
WhatsApp number:	

Name of your solution:

Why did you choose this name?

Identifying the problem: (Maximum 200 words)

I identified the following problem in my school/community/at home:

Initially I Then Eventually I could solve the problem in this way:

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Collaboration and access to information: (Maximum 200 words)

I collaborated with And accessed information from which helped me in the following ways...

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Creativity and innovation: (Maximum 200 words)

My solution was very creative because I My solution was unique and innovative because ...

Meeting E³ standards: (Maximum 200 words)

I care and want to help others:

I am a problem-solver.....

I am awesome:

I am driven by purpose:.....

I have courage and self belief:.....

I can keep going, despite challenges:.....

E3 Teacher Agency Award Form | Page 4 of 5

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

Provide us with each of the following (please include clear notes on the pictures and videos):

- Your 4 best pictures (2 in portrait and 2 in landscape)
- A VoiceNote of not more than a minute reflecting on your growth in this project
- A short video that shows an important episode in the project
- If minors appear in the photos and video, please submit permission from parents or caregivers that these photos appear on E³ platforms.
